

EFFECTIVENESS OF MANAGEMENT OF NATURA 2000 AREAS IN SLOVENIA

Preserve **1,890** bird couples on **56,010 ha** of land

Preserve or restore **habitat** properties & functions

OBJECTIVES

✔ have been set

Institute of the Republic of Slovenia for Nature Conservation

Ministry of the Environment and Spatial Planning

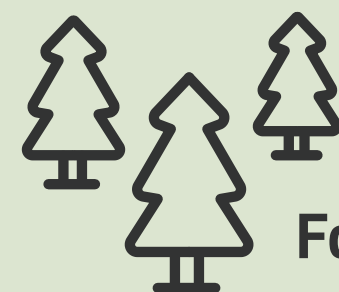

Government of the Republic of Slovenia

Farmers maintaining mountain pastures

IMPLEMENTATION OF MEASURES

○ mostly included into sectoral plans

Forest owners adjusted measures in forest management

Municipalities and ministries alternative solutions of land use

Protected areas management routing of visitors

HI!

I'm a Black Grouse,

one of 293 Natura 2000 species in Slovenia. I only live in a few areas in Slovenia because my natural habitats are disappearing. There I can find my favourite berries, a place to nest and shelter from predators.

You can help protect me by preserving such environments.

MONITORING

⊖ the weakest link

Ministry monitoring of species not adequate

Institute monitoring of implementation of measures not yet established
